NOR'WEST PROPERTIES LLC

COMPANY SUMMARY

Paul Eberharter, Principal Architect and Managing Member obtained a bachelor's and master's degree in Architecture from the University of Washington.

Paul worked his way through school by running his own design/build construction company, All Wood Construction. His firm, Eberharter Architects Inc., started in 2000 on Bainbridge Island, has been located in Kingston since 2004.

Nor'west Properties LLC is a Washington state real estate development company that is creating custom designed homes, condominiums and mixed use projects, in Kitsap County. Nor'west Properties has some similar aspects to a Real Estate Investment Trust (REIT) regarding raising capital, property acquisition and project development.

Nor'west Properties targets three distinct markets. The first is high end single family homes, the second is garden apartments and condominiums in a range of price levels, and third is mixed use projects. These mixed use projects will combine lower level commercial and retail space with condominium and apartment living on the upper floors.

Internet pages showing our projects can be seen on the web at: **www.nor-west.net**.

Paul is assisted by his staff of Architects and Project Managers in his office. The Eberharter Architects, Inc. website is **www.eb-arch.com**.
